DETAILED ACTION

Election/Restrictions

1. Claims 7-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected method, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/3/05.

Specification

2. The abstract of the disclosure is objected to because it is unclear what is meant by the phrase "for at least once". Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, it is unclear what is meant by the phrase "for at least once".

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Treusch et al.

Art Unit: 3679

In regard to claim 1, Treusch et al. discloses (fig. 10) a shrinkage-free sealing structure of a heat pipe, comprising a double-layered structure formed by transversely pressing a first side of an open end of the heat pipe towards a second side of the open end for at least once and transversely pressing the second side towards the first side for at least once.

In regard to claim 2, wherein the double-layered structure has an arrowhead cross section (fig. 10).

In regard to claim 3, wherein the double-layered structure has a narrow slit therein (see fig. 5).

In regard to claim 4, further comprising a covering portion sealing the narrow slit (see figs. 6-11).

In regard to claim 5, wherein the covering portion is formed by brazing, soldering or welding (see claims 3 and 5).

In regard to claim 6, wherein the double-layered structure has a W-shape cross-section (see fig. 5).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hsieh, Sarraf et al., Curran et al., Todd et al., Ishida et al., Treusch et al., Masters and Noren all disclose similar couplings common in the art.
